Commitment to achieving Net Zero

YOUR NRG LIMITED is committed to achieving Net Zero emissions by 20**50**.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

[Instructions to Suppliers:

Please provide details of your organisation's baseline emissions below. If your organisation has not previously assessed or reported emissions, please detail this below and use your first reporting period as your Baseline.]

Baseline Year: 2023

Additional Details relating to the Baseline Emissions calculations.

To establish a clear direction and timeline we have engaged carbonFit to review and audit our Carbon Footprint and assist in setting a clear path to net Zero for Scope 1, 2 and 3 by 2050 in line with PPN 06/21, SBTI and GHG Protocols.

CarbonFit are continuing their audit in accordance with ISO14064-1
